**TricorBraun Flex Canada** has been supplying high quality flexible packaging materials and packaging solutions to customers in North America since 2003. In 2017, Taipak was acquired by **TricorBraun**, representing TricorBraun's first move into Flexible Packaging.

**With more than 20 years of experience, we are able to provide the most innovative and suitable packing solution for customers.**

Our corporate offices in Vancouver, BC and Toronto, ON are the North American sales representatives for our manufacturing partners in Asia. Having direct control over the manufacturing process affords us the opportunity to be innovative and practical.

We pride ourselves on our customer service throughout your engagement with us. Our customer engagement process is one of collaboration where we truly take the time to understand your needs, share our decades of experience and the right solution for you.

We are an integrated company providing packaging solutions from start to finish. Our professional team is able to assist our customers from material selection to delivery arrangement. We have experts providing recommendations regarding the material compositions and applications. Our in-house design team is also available to provide artwork assistance, including artwork layouts, color suggestions, package prototypes, and press color proof.

**TricorBraun Flex aims to be the total solutions for all your flexible packaging needs.**

TricorBraun ([tricorbraun.com](http://tricorbraun.com)) is a packaging solutions company, focused on providing innovative, custom solutions for its many customers. An industry leader in glass and plastic containers, closures, dispensers and tubes, TricorBraun operates from more than 40 locations throughout North America and internationally from London, England; Guangzhou, China; Hong Kong, and Mumbai, India. Our award-winning Design & Engineering Center provides forward-thinking service driven by consumer insight, market understanding and creative solutions. TricorBraun's advisory services range from preliminary planning and manufacturing oversight to warehousing and logistics programs.

# FOIL BAG

Vancouver  
604.522.1218

Toronto  
905.604.7989

**Aluminum foil** is considered by most in the flexible packaging industry to be one of the best barriers to light, moisture and bacteria. Commonly used in the food, beverage and pharmaceutical industry, our foils are available in both stand-up bags and film formats.

**Foil Side Gusset Bags** are the most popular style of choice for coffee and tea packaging. With a hidden seal on the edge of the back corner, Foil Side Gusset Bags offer extra room for labeling and valve placement, giving you more space for brand signatures. This is an excellent packaging choice that can be easily heat sealed and closed using a tin-tie or resealable tape.

**Foil Stand-up Zip-lock Bags** have long been used as an excellent replacement for traditional bag-in-box packaging. This trend continues to grow and Foil Stand-up Zip-lock Bags are as popular as ever.

# BLOCK BOTTOM BAG

Vancouver  
604.522.1218

Toronto  
905.604.7989

Block Bottom Bags are designed with a gusset at the bottom that can act as a stable base for it to stand upright. There are also several marketing opportunities with using Block Bottom Bag as there is an ample amount of space to put in great product/ marketing graphics.

Block Bottom Bag have easy opening tear notches and ziplock closures to safeguard the contents against spoilage and spillage. It also provides options for one-way degassing valve and tin-tie.

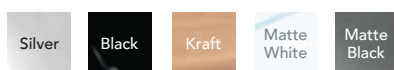

Some of the outstanding features of using a Block Bottom Bag are as follows:

- True flat bottom bag for easy and stable standing
- Quad-sealed with three-dimensional display view
- Wide opening for easy filling and pouring

Our Biotrē™ product line started in 2011 as our starting point down the path of true sustainability, and our journey is far from over. At Tricorbraun Flex we continue to expand our Biotrē™ films and with each film we develop we get closer to our simple goal by providing the industry with packaging that protects both product and the planet.

- 60% by weight is compostable, not including the valve.
- Interior Bio-LLDPE-1.0 layer (40% by weight) is Polyethylene plastic made with an additive that makes it "oxo-degrade." This additive allows plastic to breakdown into microscopic pieces of plastic over 5-10 years vs. the estimated 1,000 years needed for normal plastic.

### COMMITMENT

At Tricorbraun Flex we are committed to pursuing sustainable packaging, while offering structures that will protect your product. We are currently working on the next generation of sustainable options.

### TESTING

Biotre™ film is made from 60% (by weight) renewable plant-based resources. 60% breaks down into healthy compost using processes from OECD and conditions taken from ASTM standards.

### PROGRESS

Biotre™ film after 89 days in a composter. Based on previous tests, biodegradation will take several months, on average, in a backyard composter.

Biotre™ film after 101 days in a composter.

# KRAFT BAG

Vancouver  
604.522.1218

Toronto  
905.604.7989

Differentiate your products with one of our versatile Stand-up Zip-lock Bags made with kraft material. Kraft bags can be used for a variety of industries, particularly the food industry. It's common to see tea leaves, spices and dried fruit and nuts often packaged in Kraft bags. And as consumers become more and more conscious about the packaging used by their favourite brands, kraft paper bags are continuing to grow in popularity.

The natural kraft look is also very popular for all kinds of organic products and will surely be the kind of packaging your customers will fall for.

Our Natural Kraft Foil Bags offer high barrier for extended shelf life for your products. We also offer Natural Kraft and Rice Paper Bags with window, giving customers a sneak peek of what's inside. Zip-locks and tear notches are standard features of the bags as well.

# PLAIN VACUUM BAG

Vancouver  
604.522.1218

Toronto  
905.604.7989

Vacuum bag packaging is the most common form of vacuum packaging.

Our vacuum bags are available in multiple sizes, thicknesses, and types to accommodate a variety of products.

The most common vacuum bag thickness is a 3 Mil thickness. The 3 Mil thickness is thick enough to secure a seal for long term storage. However, larger products with sharp edges and jagged corners commonly use a 4 Mil bag thickness or higher.

- Superior clarity, strength, impact resistance and flexibility
- Constructed from 9-layer co-extruded film with a minimum of 20% PA (Nylon) with good puncture resistance
- Extends shelf life for a variety of food products
- Meets FDA and CFIA requirements for direct food contact
- Ideal for meat, fish, poultry, cheese, etc.
- Plain Laminated Vacuum Bag is perfect for applications that require pasteurization for up to 30 minutes and 95.
