

How2Recycle®

TricorBraun Flex joins the How2Recycle Program with PolyRecycle, our polyethylene/polyethylene structure.

TricorBraun Flex has developed PolyRecycle™, a How2Recycle pre-approved, flexible polyethylene (PE) film packaging material. PolyRecycle™ – which works well with dry, free-flowing products such as specialty food, pet treats and powders – is available now and pre-qualified* for Store Drop-off by consumers in the US, and curbside in Canada. Brands must be a member of How2Recycle and submit a request in order to utilize this labeling system. Store drop-off locations can be found at how2recycle.info/sdo.

*While the TricorBraun Flex PE film packaging is pre-qualified, based on product application, attachments, and other factors the recyclability can change.

Example of a custom printed PE/PE stand-up pouch

The How2Recycle label includes clear and concise recycling instructions.

Store drop-off locations can be found at how2recycle.info/sdo.

Pre-approved PolyRecycle™ structure simplifies the How2Recycle process.

This icon tells you that TB Flex PolyRecycle™ bags fall into the **STORE DROP-OFF** category.
